

Read Between the Lions Reading Skills Program for All Ages is a reading skills program developed to identify a keystone visual skill, the **jump eye movements NECESSARY for reading**. The program is designed to first of all identify a lack of coordinated jump eye movements using 3 timed eye movement tests, done in about 5 minutes. Statistically, 20% of the population, through all ages, cannot track for reading using jump eye movements. The next step is to offer effective, user-friendly remediation proven to train the eye muscles to work together by using repetitive focusing techniques, and includes an eye-hand coordination fine motor skill. The recommended initial remediation is a total of 6 hours (10 minutes a day, every day, for 36 days), with rescreening after 15 days to monitor improvement.

The program is a recognized reading tool and is available online for use for FREE ([www.readbetweenthelions.org](http://www.readbetweenthelions.org)). Teachers are encouraged to incorporate the program into their individual curriculum. You can make a difference in someone's life today by helping people achieve improved reading skills. Online meetings are held the 2nd and 4th Tuesdays, 7:00 p.m. Pacific Time. Please join us at <https://meet.jit.si/ExcitedSpeedsQuestionJovially>
