

## Report E3

I spent the majority of my time visiting clubs in Zone 1, 3, 4, the last several months. I was pleased to see while attending the zone mtg in Versailles that a well-represented number of the club's membership was there and most friendly and welcoming. The club seemed to be well run, responsive to help from district, zone support.

ZONE 3, Clubs attended were London and Woodstock.

The London Club is getting very active. They are in the process of seeking new members, raising funds to support various projects in the community. A few strong leaders in this club exist and I am sure that they will continue to grow.

The Woodstock Club was an interesting club. I attended their annual fish fry, which was a success, however I am concerned that not much has been reported by this club. I believe they are more active than the records show.... which could be said by many clubs.

We should continue to stress reporting service and events to all clubs in the district. Zone 4 is where most of my time was spent. Then advent of a new club...The Marion Ohio Club with 23 new members is now chartered by LCI, and they are now getting active in-service projects and training events. They served over 2,000 participants at the Marion Madness March for kids this Halloween. They have also planned to help the homeless by having food and clothes drive this month.

Overall, there seems to be a positive attitude coming to surface in the district. Clubs seem to be looking at their responsibilities with a more current trend.

We even have a club adding women to their club for the first time.

I would however like to see the district add a "dream team" for membership growth. It is only by the strength of members do we see the assurance of tomorrow in our district, multiple districts, nation, and world.
