

Environmental Report for August 31, 2024

Cabinet meeting in Tonasket and by Zoom

DG Chuck Robinson

I have not gotten anything accomplished at this time. I am running ideas around in my mind. We all need to be aware of our environment and what we as individuals and a club can do to make it better. I am always looking for new ideas and what other clubs are doing. Last year I had no responses from any clubs about what they are doing.

My own club does highway clean up twice a year and recycles what we can at our breakfasts. For next year we are looking to a local company to compost almost 90% of all the waste from breakfast. This involves purchasing newer plates, plastic wear, and cups. We think it will be worthwhile.

I know all of our clubs are doing so many things; plant trees, cleaning up parks and roadsides, recycling what we can, and making others aware of what we are doing.

I will attempt to get an article in an upcoming DG newsletter.
