Group and where sql

1 Clients Follet Corporation SwiftIQ Maestro Health Brightstar Notable Project Forte Group helped a parking logistics company build their app for iOS and Android. When the apps were released, the client was happy with the results. The company elt that Forte Group excelled in their proactivity. "Overall, Forte Group has a smart team. They were able to understand our requests without a lot of back-and-forths." - CTO, Park Logistics App Based on your budget, timeline, and specifications we can help you build a shortlist of companies that perfectly matches your project needs. Schedule a free consultation with a Manifest Analyst. 2 Clients AT&T GE Deutsche Bank Hewlett Packard Notable Project Following an early partnership, Exadel created an open-source and highly sophisticated IAM (Identity and Access Management) solution for enterprise use. From research to discrete data integrations, strategic roadmapping to cloud-delivery services - they wowed the client with their personal dedication, seamless communication, and resource management. "When it comes to open-source, their expertise is unparalleled. They knew what they were doing ... They're true experts." - Former Chief Security Architect, Fortune 500 Healthcare Company 4 Clients BMW Microsoft Oracle Rise Notable Project PixelPlex worked on smart contract consultation and development for a crowdfunding startup. They built the contract system and created backend processes to enhance communication between the GUI and contracts. The client was impressed with their ability to deliver throughout the project. "As for their effectiveness, PixelPlex delivered everything we asked of them on time with no major issues." - CTO, Crowdfunding Startup 5 Clients XB Software works under non-disclosure agreements. Its clients come from various industries:including medicine consumer technology business services:and more. Notable Project An educational technology firm focused on special-needs education solutions worked with XB software to build a compliance-oriented web platform. XB Solutions created two web platforms that replaced a paperwork system and have been well-received by educators and regulators alike. "They [XB Solutions] performed great. We're very pleased with them, and the development continues today. We've been very pleased, and our relationship has grown over four years." - President, Education Software Company 6 Clients ASKUN WigWare MBE Engineering Druzhba OJSC Notable Project Aristek Systems designed and developed a new contract management system and transitioned all existing data to the platform. They used PHP and JavaScript, and also handled the UX/UI. All of the work delivered by the team earned high praise and was completed on time. "The team is accessible, supportive, and sensitive to my timelines and constraints." - Head of IT, Oil and Gas Company 7 Clients MedProStor Comsystem Viking Technologies Notable Project GoodSoft developed a web tool to help a medical wholesaler monitor the humidity and temperature of their storage rooms. They built WiFi radars and developed a function that sends notifications through SMS. The solution has received positive feedback and is successfully functional. "I was very happy with the communication. Whenever my team had to address an issue, GoodSoft provided answers. They knew what they were doing." - Owner, Pharmaceutical Company 8 Clients Venstar Exchange Geolytics MedPro Group Aptagen Notable Project Azati Software created a comprehensive website and portal for a biotechnology company. They developed the research portal and added additional algorithms. The client has received positive feedback on their work. "I was happy with Azati because they were able to step up to the plate and put everything together for me in a pretty good fashion." - CEO, Biotechnology Company 9 Clients Omega Group HealthDrive Corporation SIAM Consulting INTALEV Group Notable Project A SaaS company tapped Corpitech to augment their staff with developers who would handle many of its development works and some QA work. The Corpitech developers mostly work with Microsoft SQL Server, ASP.NET, and C# technologies. The ongoing engagement has been meeting the company's expectations. "At a high level, we've been working with them for a long time. We're happy with the service they're providing." - Founder, SaaS Company 10 Clients dreamshopd.com Mothersfamilyrings.com Spiral Media Alldo.se Notable Project MageWorx partnered with a funded startup in order to work on web and e-commerce development for the client. The client wanted digital based stores for their organization. Using Magento 2, MageWorx was able to develop multiple stores for the client. The stores have seen a large amount of success since their launch including one of the stores receiving over 80,000 new users after its launch. "We gave them the parameters regarding what to implement, as well as the graphic design. They managed the project well and executed the UI and shop pixel perfectly, which was exactly what we needed for this project. They delivered on that." - CTO, Funded Startup 11 Clients UNDP Wargaming National Library of Belarus Notable Project PRAS recently worked on web development for a social integration non-profit. They designed and implemented a portal for that client to help them connect refugees with locals. "Their project manager and art director are always ready to help us better understand the product, suggesting improvements to enhance its value." - Vice President, Social Integration Non-Profit 12 Founded in 2012, 12devs is a software development firm. Their small team is located in Grodno, Belarus and offers custom software development, web development, blockchain, application management & support, and more. Notable Project 12devs redeveloped a web-based management application for an infrastructure management solution. The client wanted to preserve all infrastructure while improving UX. The project consisted of nine phases. "They definitely came through with their claims." 13 Clients Food Track Bodies JetPro Refunite Notable Project Nord-Soft provided web and mobile app development services to a banking company. The team added features and functionalities to the existing platforms. The company was pleased with their work, noting their flexibility and technical expertise. "The ability of Nord-Soft to easily and rapidly integrate a new developer for our project when we needed it was a very appreciated aspect." - CTO, Banking Company 14 Midsize ERP consulting and SI company Invento Labs LLC, is based in Minsk , Belarus. They provide ERP consulting and SI, CRM consulting and SI, custom software development, BI & big data consulting & SI, and more and were established in 2009. 15 Clients Halo Voice 3DShowing.com Jobcast Adenium Systems Notable Project Alverden Systems LLC helped an analytics and software provider develop a job bidding app for construction contractors by setting up a bidding portal. They constructed a hybrid system that utilizes both MySQL and DynamoDB, and instituted an Angular UI. Thanks to Alverden's hard work, the provider was able to stay on schedule and remain under budget. "We're completely satisfied and would use [Alverden Systems LLC] again in a heartbeat. We wish more of our vendors worked like [Alverden Systems LLC]." - VP of Contractor Business, Analytics and Software Provider 16 Clients Decisely Inc EssentialHub Notable Project CleverLabs built a benefits administration platform for an insurance company. The new solution allows their client to service their businesses efficiently, with the ability to scale as needed. The team is passionate and skilled. "Thanks to them we still love to work on our codebase, it doesn't feel like a 4 years old product - it still feels brand new." - Director of Engineering, HR Company 17 Notable Project MITRIX Technology developed a data exchange built on an API for a small healthcare company. Via Bluetooth, a blood pressure device connects to a patient app, which then submits the data to a piece of analysis software. After testing completed, no issues were reported. "It has been tested and no mistakes have been reported." -ICT Leader, Small Healthcare Company 18 Clients Reonomy Palazzone 1960 SecuSurvey Notable Project IT Creative Labs developed a marketing automation solution to streamline the creation of monthly newsletters for a digital agency. They created scalable templates and personalization features to improve engagement. The solution notably increased sales and generated an ROI. "They were willing to help and find the best solution to any problem..." - Former Marketing Cloud Lead, Digital Agency 19 Clients Industrack EmailPhone CentMobile Notable Project Dana Networks Inc partnered with a telecom company. Dana Networks Inc provides their services as a software development and technical support team. The company enjoys working with Dana Networks Inc. "What's good about them is that they took ownership and don't try to hide things." - Co-Founder & CEO, Telecom Company 20 Clients Notable Project Xfuturum developed a dashboard for a marketing platform. The dashboard was to be used in the frontend and was made using AngularJS. Xfuturum was able to partner and adapt to the platform for other projects after that. "The results and the delivery speed at which they did it." - CEO, Marketing Platform 21 Small website development firm Finsurfer, is based in Warsaw, Poland and Minsk, Belarus. The team specializes in web development, custom software development, CRM consulting and SI, mobile app development, and more. 22 Clients Aktia bank Conmio OY Arkkeo Notable Project Nasty Creatures was subcontracted by an e-document solution provider to develop both the front and back-end of the service. Nasty Creatures also worked on UX design for the provider as well. The provider has seen good results so far and continues to work with Nasty Creatures. "I measure how well they complete the tasks we give them within a given timeframe. In testing, I measure how well a product is launched against expectations. I think in both areas they've been outstanding." - CEO, E-Document Solution Provider 23 Notable Project For over 6 years, Technoton Engineering has helped a manufacturing enterprise develop new technologies for their plant. The team has developed checking interfaces, meter calibration stations, and more. "We were lucky to find Technoton Engineering." 24 Notable Project DATASPECTRUM used AI to improve the accuracy of air quality sensors for an environmental products company. They implemented a deep-learning algorithm that allowed for the calibration of many individual sensors in real time. They handled the front and back end development, as well as the quality assurance and construction of a model for handling the data. The client was very happy with the result of the project and was impressed with their commitment to finding the best solutions for various problems. "They tried their best to solve our problems at every step of the way instead of just writing code and getting paid." - CEO, Environmental Products Company 25 Clients Sberbank MoneyMan IDFinance ATM Online Notable Project A financial services company hired HES FinTech to develop both the front end and back end of an application with all the necessary integrations. The HES FinTech team also provided business analysis services. Because of this engagement, the company now operates with a top-notch software that automates many processes and helps to decrease operational costs. "The developers are well-trained and experienced in building automated loan origination and loan management systems." - COO, Financial Services Company 26 Headquartered in Minsk, Belarus, Fideware is a midsize software development firm.
