In order GÄf © Näf Ä © rale, smartphone manufacturers upload its multiple software products included by software a dÄ € vocal recording. However, sometimes here any software of this type is included among the available applications. What to do in this situation one? Ä Ä Ä Ä © © for free from Google Play software (paid or free) DÄ € voice recording. There is an extremely wide range of such programs, among which you can choose the one that best suits your needs. At dÄ € Example, we chose a free smart voice recorder app here here, very popular. This application contains all the functionality © s nÄf Ä © cessaires for voice recording, but Äf © also as ita is the case of many versions of free software, a stay Ä © series of spots. This enters some discomfort, but helps to have familiar with the software before buying. On the illustrations, see these Spots ReprÄf © Senta © S as Gray Rectangles. Locate the intelligent Voice Recorder application in boutique, DÄ € ApplicationSÄ, Google Play. LÄ € icon of this application in Google Play Ä © and shown below: TÄf © LÄf © Upload and install this application on your smartphone. Audio file registration Open the application. The software window, once launched Ä © is illustrated Ä © and below. To start recording, press the red button or button Ä, «Ä, Start Recording" (start recording) Ä, 1. During recording, the large button is displayed a red meter showing the time Ä Ä Ä Ä © leaked from the beginning of recording purposes. Above this button, you can see a © evolve the sound recording volume indicator. During recording, speaking Pras microphone holding the smartphone is in front of you, both as a conversation during the state ä ä ä © © Suono (hurry Ä © against the ear). To stop recording, press the Large Rougeä button again, 2. You can continue to record DÄ € after a stunt in Ä © Result By pressing the red button. To complete the recording, press the Ä button, Ä «Ä, Finish" (END) Ä, 3. The recording backup window opens sa. By default Ä ä ä ä ä © being a name GÄf © Näf Ä Ä © Result automatically Ä © ä © is proposed. Replace this name with a more name buy © HENSIBLE ÄÄ: Facilitate your audio file management in which they are loaded on the CMS interface. Press the OK button 5. A list of audio files opens SauzzardÄ © S SA, from which you find the newly created audio file © St. The audio line contains the credit date Ä ©, duration © and and the volume of the audio file. It also contains a © menta © reading management. You can book Ä © Äf Ä © cost the registration you to run. The audio file is recorded Ä ©. Now is the transÄ © of the computer RER. To transfer an audio file to the computer we will see two of the hands TransÄf © Rer an audio file on the computer: via a cloud storage (Dropbox): As a piece attached to an e-mail message Äf ©. To choose the option DÄ € Enter the file, press and hold the line to record up to 6 here SA opens a window that displays the list of other actions available to this record. Ä, select "Share area | Ä," (Share) 7. A new window opens SA, which shows the options differ © renditute DÄ € Sending the selected file. Transfer from a file to use Dropbox If you see this options window from the Dropbox app icon, it means that it is installed here Ä © and and you can use it for TransfÄf © Rer the file to the computer. Press the Dropbox icon, 8. A window opens sa, displaying the list of folders Dropbox. Create a new folder where you want to place the recorded audio files. To do this, press the file icon located in the upper right corner 9. In the window that appears, enter the name of the new folder 10 and press the "CRAS ©" button. The file you came to create. His name is in title. Press the "Add to" button 11. The audio file is located in the folder. Shortly thereafter, he too appears in the same Dropbox folder on the computer. Transfers to the aid of another cloud storage space are identical in all aspects of the process described above, or resembles some details. All storage spaces are based on the same principle: data synchronization between the various user devices. So, just install the Dropbox software on multiple devices and to indicate the folders that need to be synchronized. Then, it will be enough to place a file in a folder of this type so that the file is displayed simultaneously on all devices connected to this cloud service. Important: For file transfer can take place, your smartphone and computer must be connected to a network: or to the same local network or Internet. Transferring an audio file from e-mail If you do not have a dropbox or another cloud storage space, you can send the audio file you have created via smartphone e-mail on your computer. To do this, you will need an e-mail application on your smartphone and your computer. Choose the e-mail software icon. The writing window of an electronic message is opened. The "from one" field contains the address of your account. In the "A" field, enter the address of the recipient 13. Can act from the same address if you use the same e-mail address on your computer and on your smartphone, or that can be a different address. The important thing is that the message can be opened on the computer and the attached file can be saved. In the (object) "Object" field, specify the file name or any other text that will allow you to identify this message. Press the button 14. "Send" (send). The audio file of figure together with the message Attachment: It is therefore sufficient to enter the address of the recipient and the message object. Open the message on your computer and save the audio file attached to the folder to provide this purpose in the computer structure. Audio files transferred to your computer must be checked and possibly correct. You will find advice on correction of audio files in section Ä, «Ä, Ä, AudioÄ, processing files." Remembering something important when it is © ä, - Ä "€ s notes type, maybe when youÄ € ä, - Ä " € King Walking Gold Multitasking? Use Google Keep on your phone Gold Tablet to record your thoughts. Any note is created a voice recording Note includes audio recording and text transcript. Note: You can only create voice notes on Mobile devices, goal You can view, modify and delete them on any device. OPEN MOBILE DEVICES ONLY THE MASTIO APP AND BACK, TAP SPEAKÄ € . When the microphone appears, start talking. When youÄ € ä, - Ä "€ king Finished, stop talking and recording stops. YouÄ € ä, - Ä "€ ll See what he said in the text note. (Optional) Review and edit The Voice Note: To listen to recording, tap Play. To change The text, touch it. For adding Änd a title, enter one in the field of title. Tap back to save the note and go to the notes page. Android devices only opened the application firm and tap the note you want to add a voice note for. In the lower part, faucet Registration. When the microphone is displayed, start talking. When you're finished, stop talking and the recording stops. YouÄ € ll see what you said in the note text. (Optional) To listen to registration, reproduction tap. (Optional) To change the text, tap it.ä, Tap Back Ä, to save the note and go to the Notes page. Open the Keep Eun app Touch the note that your vocal note has. Next to the recording, click or tap Delete. Click Delete to confirm. Joe Hindy / Android Authority Authority The most useful features of any Android device is the possibility of recording yourself. There are many reasons to want to do so well. Musicians may want to record a new idea, journalists need to record interviews, and some even configure it to see if they speak in sleep. The good news is that you don't have to go and buy a voice recorder somewhere like Amazon or Walmart. Your smartphone is perfectly able to manage it for you! Ä, here are the best apps for the voice recorder for Android! Note The recruitment of the apps also has voice recording capabilities. You can find our best list for the one just below. Only Voice Recorder is one of the apps for the most competent voice recorder. Register in a variety of formats, including the popular ones like MP3, FLAC, WAV, OGG and M4A. There is also a cloud integration for easy loading on Dropbox, Google Drive and others. You get a pile of smaller functions, such as playback speed controls, the possibility of automatically jumping silent parts of a recording, a gain switch and support for Bluetooth devices. It is a surprisingly strong offer for your price tag. Dolby On is one of the new apps for the voice recorder in the list. You can record much more with it, but the tools also help those registration items. The app includes various boosts and filters to improve sound quality. Furthermore, it has an audio editor above medium for after registration ends if you need such a thing. Some of the filters include noise reduction, de-essior and even a fade and output effect. It is mainly for musicians, but it's also good enough for vocal memos and other things like that. It is also completely free without announcements that make it one of the really fantastic apps of the free voice recorder. Easy Voice Recorder does what the name suggests. Provides an easy method to record things with the phone. Open the app, press the MIC button, record, share as necessary, then close the app. It also has some additional features, such as the possibility to change which type of file type is recorded. It also has widget support. The PRO version also includes support for stereo recording, bluetooth microphone support and more. The PRO version also removes advertising from the free version. Hi-Q is one of the most powerful apps for the voice recorder outside. Register in MP3. This makes files compatible with virtually all sound. Along with this, you can automatically charge Dropbox recording finishes. It is also equipped with a widget support, the possibility to choose which microphone on the device you want to use (allowed you have more than one), support for Wi-Fi transfer, gain control, and more. The paid version adds a couple of more characteristics as well. The only negative is that it is necessary to register T phone call. Lecturotes is one of the best applications for university students. You do a lot of stuff. You can take notes, organize those notes, and use them later for homework. The application doesn't record audio in native. However, there is a \$ 1.99 plugin that adds that the functionality. Also, allows you to record stuff while using regular application lecturotes. This makes it a great one-two combo for, well, conferences. You can also get a video recording plugin, so. EA € s also \$ 1.99. It's a bit of a heavy package. So, we donÄ € t recommend this for people looking for a simple, light recorder. However, if youÄ € college king, this is about as good as you get. Music Maker Jam is an audio recording app for musicians. EA € s a large application for recording some texts, texts, Or whatever you want to do. The app records more tracks, includes an editor for the fine adjustment of your production and additional remixing tools and otherwise master your work. There are in-app purchases. They allow you to buy things like loops and other such content. It also has a direct integration with SoundCloud, Facebook and most other social networks. This is a bit very much if you just need to record a meeting or a conference at school. However, musicians should definitely try this first. In-app purchases unlock various sound effects, samples and other sounds. Price: free / \$ 9.99 per month is a voice recorder for professionals. Its functionality set is mainly for work meetings and other more serious issues. Bases such as recording, sharing and reproduction. It also includes a transcription service, a cloud storage, multi-platform support and also supports things like photos. The free version includes 600 minutes of transcription per month. The Premium subscription offers over 6,000. It is also no half bad for lessons and students get a discount for \$ 2.99 a month if you want to go to that path. It is very powerful, but only if you really need things like cloud storage, transcripts and something more powerful. Smart Recorder is one of the best apps for the voice recorder, even among its peers. Comes with all the usual features, including cloud storage support and various recording functionality. However, you also get small things like skipping silences on the track, sensivity controls, adjustable sampling rates and more. It gets frequent updates and Rocks at 4.7 evaluated on Google Play at the time of writing. It is one of the good and even the premium version is economic. Fortunately, Voice Recorder Pro is a better app than its name Blando would implicate. It is a completely close-up app that loves to hold it simple. You will be able to record in PCM (Wave), AAC and AMR that gives you a good variety of options. Also, the interface is easy to use, the files are easy to find and managed and this can be used to record phone calls (if your device and operating system supported). It also has other features like a bitrate option and much more. It is one of the app for the most repairable and simple voice recorder. This is also free if you use Google Play Pass. The apps of the voice recorder on the phone are not slouch. For appetizers, they are always free. They also already installed, so he won no more than your storage space. They are generally simple with the basic features. However, for some devices, such as LG V series phones, the Voice Recorder app can touch the phone's hardware functionality that apps for third-party voice recorder simply cannot do. We also listen to the app for Google's voice recorder is quite good. In any case, it is advisable to try the voice rector stock on any device before going to third parties only to make sure you haven't lost some exceptional functions.
