Binance provides you with a lot of tools that will help you a lot in trading through the platform for free. About the Binance App crypto trading platform There are a lot of different applications that you can trade in digital currencies for free and there are some with money, but there are a lot of different applications that may defraud you at any time and steal your money. Or even that these platforms may not provide you with the necessary tools that help you start in the field and reap a lot of money. But there are a lot of platforms for trading different cryptocurrencies, and the most famous of them is the Binance platform. Binance is a cryptocurrency trading platform, one of the largest cryptocurrency exchanges around the world in terms of the trading volume. It has been the company was founded by a Chinese programmer Changbinj Zhao, a Chinese man Canadian business and is the CEO and founder also at the same time, and was formerly a member of the team who developed the encrypted currency portfolio Blockchain, and has a lot of achievements in the world of digital currencies. The company was headquartered in Binance in China, but later the fishing imposed some restrictions on cryptocurrencies and moved the company's headquarters outside China. Although the platform is safe, in 2019, Binance revealed in an official statement that it had been hacked, and about 7 thousand bitcoins were stolen, and its price at that time was up to 40 million dollars. The president came out executive of the company that they will do to compensate customers through its asset fund. Despite that, the company is becoming the highest and the best ever in terms of constantly developing its own protection system in order to maintain the safety of customers through various verification systems. The great thing about the company is that it has developed a platform for phones, which is the Binance mobile application, where you can trade cryptocurrencies through your phone instead of a computer. And not only trading, the Binance cryptocurrency trading platform allows you to buy bitcoins and other cryptocurrencies and sell as well, and a lot of the features available on the platform beside the chat section with their customer support. The Binance app is one of the simplest applications on the phone that enables you to buy and sell cryptocurrencies easily and comfortably, all over the world for free. You can download binance app in the mobile cryptocurrency trading platform Binance for Android with a direct link apk and the company provides the platform on the Google Play Store for free. The platform also supports all phones running the iOS operating system and is available on the Apple Store for iPhone phones. Features of Cryptocurrency Trading Platform The Binance app provides you with a lot of wonderful additions that give a lot of details that will help a lot in trading cryptocurrencies from the mobile and here are the most prominent features. 1- It is nice about the platform that it supports many languages of the world. 2- The platform is completely free and you will not need to pay any fees, but you will pay when trading the fees are not great. 3- It is possible to deposit through the Binance application on the phone, in addition to withdrawing through. 4- The Binance app provides you with the ability to buy and sell through without the need to enter the site. 5- The user interface is very simple and not complicated. 6-is characterized by the application of light that Binance on all phones of the middle class. 7- Binance app provides you with easy charting and trading tools. 8- The Binance cryptocurrency exchange includes a lot of cryptocurrencies such as the Crypto App. 9- It provides you with a great deal of safety that increases the security of users through strong security protocols and this helps many users to protect money, and this is because Binance has many layers and this is for security and this is so that you can decorate digital assets to trade safely and this is also through the Binance application. 10- It provides you with support 24 hours a day, 7 days a week. It is available 7 days a week. This support is specialized where you can have a chat through the Binance app and with a trained and specialized support team. 11- Available in many countries around the world until this moment. 12- The Binance app provides you with a copy within the base application in the name of Binance Lite, and this is in case you want to make the application faster and light on the phone, it disables the additions that are not of great importance. 13- The application provides you with the ability to search within through the search box inside. 14- You can register on the Binance cryptocurrency trading platform for free. 15- You can control a lot of the settings of the Binance app, such as the language, currency type, payment currency, custom color indicators, and many other settings that suit you. There are a lot of features and additions that the Binance cryptocurrency trading platform provides for free, which you can explore on your own, because the application is always updating and adding to it a lot of different additions. How to Register on Binance App? binance app download and installing the Binance app. Open the Binance app and click on the login/register button at the top. How to Register on Binance App You will find the word "record" at the top of the screen in yellow, click on it. Enter the required data, which is your email (Gmail or Yahoo) and in the second quarter a strong password (the password must be at least 8 numbers and upper and lowercase letters). Agree to Binance's terms and then tap the arrow on the side of the screen. A verification code will be sent to you by email, enter the box and click send. Explanation of the cryptocurrency trading platform Binance App In order to use the Binance application, you must register with it and activate the account so that you can start the trading process through the platform. The platform is very simple and easy to use. I will explain to you the important things within the platform, which are the basics such as deposits, withdrawals, trading ..... and other important things. After registering in the Binance app, you will find a bar at the bottom of the application. You will find 5 options, which are the following: Market: It is where you will find all digital currencies their prices, and you will find next to each currency the rate of rising and fall in the currency and the same thing in contracts and regions. Trades: When you enter this option, you will find the Binance app that displays a welcome message, and offers you to watch a set of instructional videos that will help you a lot in learning to trade. Through this section, you can start buying and selling currencies. Futures contracts: This section will buy contracts. Wallet: This is the deposit and withdrawal through the application and I will explain the deposit and withdrawal to you. You can site the Binance cryptocurrency trading platform, a practical platform from which you can learn many important things, with pictures and videos, in a simplified explanation in Arabic. through the official website. How to Deposit Cryptocurrency on Binance App? Open the Binance app and go to the wallet. You will find options, choose Deposit. Choose the digital currency you wish to deposit with. You will be presented with a network for the deposit (you have to choose carefully) and you have to make sure that the network you have chosen is the same platform from which you are withdrawing funds. Click on the button to copy the deposit address into the Binance wallet and paste it on the platform you want to withdraw from. After the order is confirmed, you have to wait for the order to be processed, and the money will be added to the account in the Binance app. How to withdraw cryptocurrency on Binance app? Open the application and go to the wallet. Choose from the options Withdraw. Choose the digital currency you want the values to withdraw. Paste your wallet address in the box (you have to make sure which wallet you want to withdraw to because if you choose the alum incorrectly you will lose money). Enter the amount you want to withdraw and the Binance application will reject the fee that you will get and the final amount. Click on withdraw and it will ask you to confirm the transaction. You have to confirm the transaction more than once, and a code will be sent to you to confirm the email. After confirmation, you have to wait for the conversion to be reviewed.
