It has released a bugged Nougat version two months later of the Oreo release, and looks like there's no plan to fix that version. That's why some people stuck on Android 6.0. 9 Posts 09-20-2017 Argentina 11 Signins 60 Page Views Posts: 9 Registered: 09-20-2017 Location: Argentina Views: 60 Message 6 of 24 2018-08-12, 2:06 AM Nope because they don't care about customers,so they will let us in ice age , I will never ever again buy lenovo and never recommend any lenovo product to no onePainful experience 1 Posts 04-26-2017 Nigeria 5 Signins 22 Page Views Posts: 1 Registered: 04-26-2017 Location: Nigeria Views: 22 Message 7 of 24 2019-01-18, 23:40 PM Becoming increasingly useless as I can hardly do anything meaningful my tablet anymore. This issue is now making certain apps virtually unusable and developers refuse to assist as the OS is not supported!I have to say, the terrible lack of support from Lenovo is the reason I will never again by a Lenovo product (and this is someone who has 4 Lenovo tablets and 2 laptops in the house), 27 Posts 04-18-2018 Spain 40 Signins 258 Page Views Posts: 27 Registered: 04-18-2018 Location: Spain Views: 258 Message 10 of 24 2019-03-13, 19:53 PM Hello.Finally I've after see that our Tablet will not get any update and the 7.1 update is full of bugs and battery drains. I've decided to go to dark side. I've searched on XDA for a ROM for this tablet, and there's a official LineageOS Rom v16 (Android 9). Is official by LineageOS developers not Lenovo, so if you wish to install this ROM, you've to unlock your tablet (loosing your warranty), and also loose some lenovo things like Screen and audio cast, and Dolby. For me there's no problem because is not my first Custom firmware and Viper2Android is enough to have a good sound.Is much faster (my table was laggy with original ROM), and have less bugs, so if you don't care about your warranty and some other stuff, just search on XDA for this ROM. Of course you need some knowledges about computers to follow the guide.Greetings!!
