Create Backgrounds: Add a sunset or starry sky behind the zoo scene for more depth. Draw and color trees or plants around the animals, using various shades of green. Seasonal Themes: Make animals wear seasonal accessories, like a scarf on a giraffe for winter or sunglasses on a lion for summer. Add fall leaves or snowflakes in the background based on the season you choose. Shadowing Techniques: Basic Shadowing: Use a darker shade of the animals base color to add shadows under the belly, under the chin, and at the base of the legs to create depth. Layered Colors: Apply multiple layers of color to add richness. Start with a light base color, then gradually add darker shades for texture and dimension, especially on animals fur and feathers. Gorillas are incredible creatures that can be quite dangerous and intimidating due to their immense size and strength. This one looks rather calm, however, and its ready for you to add some color to it. Gorillas usually have a darker grey color scheme, so you could go for that or take a more stylistic approach. What will you choose for this first animal? 2. An Adult Elephant in the Zoo Coloring Page The second page that we have for you features a magnificent African elephant. These animals are incredibly majestic and have an air of nobility about them. They are usually grey in color, and even if you stick to that color there are ways that you could incorporate some brighter colors. One way to do this would be to draw a background that shows off the enclosure this elephant is in. That would be a great way to use some bright greens and rich browns for some natural colors to balance off the grey of the elephant.
