My car, a W211 2007 facelift, has it as standard and i was wondering if anyone here has been unfortunate enough to activate it! If so in your opinion does it work, as in did the system slow you down rapidly enough to avoid hitting something! Joined May 17, 2006 Messages 9,117 Car -. My car, a W211 2007 facelift, has it as standard and i was wondering if anyone here has been unfortunate enough to activate it! If so in your opinion does it work, as in did the system slow you down rapidly enough to avoid hitting something! My understanding was that presafe on the W211 facelift was primarily about priming the car for an accident - so pre-armed the airbags, moved the seats, tensioned the seat belts, closed the windows and sunroof. So it's about protecting the occupants when the car thinks it's going to hit something rather than about slowing it down. That's still down to the driver and his/her reactions boosted by the BAS+ system. Joined Aug 23, 2011 Messages 1,184 Location Staffordshire Car A big one Wot Dryce said. This isn't the system that will stop you even if you're not looking. From your manual: PRE-SAFE® system PRE-SAFE® system takes pre-emptive measures to protect you in certain hazardous situations. PRE-SAFE® intervenes in the event of: emergency braking situations, e.g. if BAS Brake Assist intervenes critical situations involving driving dynamics, e.g. if the vehicle oversteers or understeers significantly due to physical limits being exceeded If you are driving faster than approximately 30 km/h, PRE-SAFE® takes the following measures in the aforementioned situations: It tensions the front seat belts. Vehicles with memory functions\*: it adjusts the front-passenger seat if this is in an unfavourable position. If the vehicle skids, it closes the sliding/tilting sunroof\* and side windows so that only a small gap remains. If the hazardous situation passes without resulting in an accident, PRE-SAFE® releases the belt pretensioning. You can then reverse all settings made by PRE-SAFE® again. If the seat belts are not released: Move the backrest of the seat back slightly until the belt tension is reduced. The locking mechanism releases. Joined Nov 12, 2009 Messages 1,549 Jumperjohn. think you are hoping you have distronic II. . Which can slow down when you are using the cruise. Presafe does not do this a stated above. joined Sep 14, 2004 Messages 4,792 Location Uxbridge Car C350. Duster, S320, 900ss and a few more Had something similar in a brava (yes, a fiat) during the timbuktu rally... Quite funny actually (as I wasn't in the car, but in front of it) - essentially, the rattling and offroading caused the car to think it was in an accident scenario. . It shot back the drivers seat (and locked it there), tensioned the seatbelt (and locked it there) and inflated the airbag. The poor driver suddenly found himself out of reach of the wheel/pedals, pinned to the seat and with an exploding airbag centimeters from his face... Almost cause an accident! The funnier part was that they still had 1000-odd miles to drive to Bamako, which they had to do without seatbelt; a cut-off airbag and sitting on the edge of the seat M. Reactions: 4 people Joined Nov 12, 2009 Messages 1,549 Fortunately pre-safe is not a one shot system.. It works again and again. Presafe does not do this a stated above. Yes, just impact preparation for my car. I thought it also had the radar function but it seems not. Joined Aug 23, 2011 Messages 1,184 Location Staffordshire Car A big one Yes, just impact preparation for my car. I thought it also had the radar function but it seems not. If you post or PM me your VIN (starts WDB211...) I'll get your data card that shows what's on your car. Joined May 27, 2013 Messages 14 Location Stoke-on-Trent Car W212 E350 facelift (Night Edition) Just bought a W211 E280 CDI face lift at auction 51000 miles it has warning on the dash...."pre-safe inoperative" how do I clear it?....please don' t say take it to the main dealer, is there a simple fix? Joined Mar 23, 2004 Messages 6,957 Car C350 I did the safety demonstration at MBWorld and it was very impressive. We basically drove at 70mph towards a cone wall on a water logged track. The driver then stood on the brakes and the BAS, ESP, traction control and Presafe all did their thing. The ABS came into effect and slowed us very rapidly indeed. the seats went to a more upright position and the sun roof shut and he managed to steer around the cones joined Nov 30, 2011 Messages 1,005 Location Essex Car 2012 S350L BlueTec I've experienced it on a country road when a deer ran out from the trees and just stood on my side of the road. I couldn't swerve as a cyclist was walking their bike along the other side of the road so just dropped anchor. The sunroof (which was tilted up) shut, the belt pulled me (quite violently) back into my seat and the seat itself moved slightly more upright and I remember being surprised how quickly the beast stopped. The system definitely works! I'd quite like to experience the car stopping by itself, it would be quite eerie. Joined Apr 24, 2013 Messages 165 Location North of Aberdeen Car 211 320cdi Elegance estate. Soon to be sold RR Vouge, Defender, Triumph Daytona and Thunderbird My 211 estate has Distronic. A very odd feeling having the first drive and finding the car automatically braking in traffic queues. Joined Sep 10, 2008 Messages 338 I managed to activate mine once. Traffic lights onto the start of a m-way go green. Off I go and around the corner in the middle lane is a broken down saab. I knew there were cars beside me and with nowhere to go stood on the brakes. So as soon as the ABS activated the seat belt pulled me back and I'm sure a few other things happened as well. It must have taken 30 seconds for the car to relax and the seatbelt to let go of me. I assumed it was just clenching it buttocks, the way I do when in the passenger seat with the missus. Joined Jul 21, 2010 Messages 73 Location Were Hertfordshire Car CLS 350CDI It works only when you need it. M25 can have some terrible drivers on it at the weekend.
