 line 3. City, Country
 line 4. e-mail address if desired

Abstract—This electronic document is a “live” template and already defines the components of your paper (title, text, heads, etc.) in its style sheet. *RTF files do not use Symbol, Special Characters, or Math in Paper Title or Abstract (if desired)

Keywords—component, formatting, style, styling, insert (if needed)

I. INTRODUCTION (Heading 1)

This template, modified in MS Word 2007 and saved as a “Word 97-2003 Document” for the PC, provides authors with most of the formatting specifications needed for preparing electronic versions of their papers. All standard paper components have been specified for three reasons: (1) ease of use when formatting individual papers, (2) automatic compliance to electronic requirements that facilitate the concurrent or later production of electronic products, and (3) conformity of style throughout a conference proceedings. Margins, column widths, line spacing, and type styles are built-in, examples of the type styles are provided throughout this document and are identified in italic type within parentheses, following the example: Some components, such as multi-level equations, graphics, and tables are not prescribed, although the various table text styles are provided. The formatter will need to create these components, incorporating the applicable criteria that follow.

II. HOW TO USE

A. Selecting a Template (Heading 2)
 First, confirm that you have the correct template for your paper size. This template has been tailored for output on the US letter paper size. If you are using A4-sized paper, please close this file and download the file “MSW_A4_format”.

B. Maintaining the Integrity of the Specifications
 This template is used to format your paper and style the text. All margins, column widths, line spacing, and text fonts are prescribed; please do not alter them. You may note particularities. For example, the head margin in this template measures proportionately more than is customary. This measurement and others are deliberate, using specifications that anticipate your paper as one part of the entire proceedings, and not as an independent document. Please do not revise any of the current designations.

III. PREPARE YOUR PAPER BEFORE STYLEING
 Before you begin to format your paper, first write and save the content as a separate text file. Keep your text and graphic files separate until after the text has been formatted and styled. Do not use hard tabs, and limit use of hard returns to only one return at the end of a paragraph. Do not add any kind of pagination anywhere in the paper. Do not number text heads; the template will do that for you.

Finally, complete content and organizational editing before formatting. Please take note of the following items when proofreading spelling and grammar.

A. Abbreviations and Acronyms

Define abbreviations and acronyms the first time they are used in the text, even after they have been defined in the abstract. Abbreviations such as IEEE, SI, MKS, CGS, ac, dc, and rms do not have to be defined. Do not use abbreviations in the title or heads unless they are unavoidable.

B. Units

- Use either SI (MKS) or CGS as primary units. (SI units are encouraged.) English units may be used as secondary units (in parentheses). An exception would be the use of English units as identifiers in trade, such as “3.5-inch disk drive.”
- Avoid combining SI and CGS units, such as current in amperes and magnetic field in oersteds. This often leads to confusion because equations do not balance dimensionally. If you must use mixed units, clearly state the units for each quantity that you use in an equation.
- Do not mix complete spellings and abbreviations of units. “W/m²” or “watt/m² per square meter”, not “watt/m²”. Spell out units when they appear in text: “a few meters”, not “a few ft.”
- Use a zero before decimal points: “0.25”, not “.25”. Use “cm”, not “cc” (*thicker font*).

C. Equations

The equations are an exception to the prescribed specifications of this template. You will need to determine whether or not your equation should be typed using either the Times New Roman or the Symbol font (please no other font).

*Identify applicable specifications. Use squares, dots, and brackets to separate.

Preparation of Papers for Special Issues of IEEE TRANSACTIONS ON APPLIED SUPERCONDUCTIVITY

First A. Author, *Senior Member, IEEE*, Second B. Author, Jr., and Third Author (第三 著者), *Fellow, IEEE*

Abstract—These instructions give you guidelines for preparing papers for special issues of IEEE TRANSACTIONS ON APPLIED SUPERCONDUCTIVITY. Read this document to understand the publication process, editorial policies, and standards being applied to your manuscript. You may use this document as a template if you are using Microsoft Word 6.0 or later. Otherwise, use this document as an instruction set. This template is also useful for estimating the length of your paper, keeping in mind that the final text and graphics will receive formatting by IEEE Publications. Paper titles should be written in uppercase and lowercase letters. Avoid writing long formulas with subscripts in the title; short formulas that identify the elements are acceptable, such as “Y–Ba–Cu–O”. Do not begin a title with the word “On.” Avoid starting a title with articles like “The.” Do not write “(Invited)” in the title. Full names of authors are preferred, but initials may be used instead. Put a space between authors’ initials. This template includes non-English fonts for author names. Department names are optional in the affiliations. Do not give street addresses in the affiliations. Define all symbols used in the abstract, and repeat the definition in the text. Do not cite references in the abstract.

Index Terms—Please choose 4 to 5 keywords or phrases in alphabetical order, separated by commas. A list of suggested keywords is at www.ieee.org/documents/taxonomy_v101.pdf.

I. INTRODUCTION

THIS DOCUMENT is a template and instruction set for preparing manuscripts for special issues of the IEEE TRANSACTIONS ON APPLIED SUPERCONDUCTIVITY. Special issues are reserved for the publication of scholarly articles of work presented at conferences, including the Applied Superconductivity Conference and the Magnet Technology

Automatically generated dates of receipt and acceptance will be placed here; authors do not produce these dates. Acknowledgement of financial support goes here. This work was supported in part by the U.S. Department of Energy under Grant ABC-123456. If requested, an optional statement of author contribution, and an optional declaration of the corresponding author, can be added. (All authors contributed equally to this work.) (Corresponding author: First A. Author.)

F. A. Author is with the Fermi National Accelerator Laboratory, Batavia, IL 60510 USA (e-mail: author@fnal.gov). Phone or fax information is not required.

S. B. Author, Jr., was with Rice University, Houston, TX 77005 USA. He is now with the Department of Physics, Colorado State University, Fort Collins, CO 80523 USA (e-mail: author@lamar.colostate.edu).

T. Author is with the Electrical Engineering Department, University of Colorado, Boulder, CO 80309 USA, on leave from the National Research Institute for Metals, Tsukuba, Japan (e-mail: author@nrim.go.jp).

Template version 6.0, July 10, 2015. Remove the template version text above. The corresponding author e-mail address should be the same as the address used to create the Author Gateway account. Authors may insert native language fonts where appropriate for names and institutions.

Conference. The process of publishing special issues is somewhat different than other processes used to publish conference proceedings. Articles are *selected for publication* by the editors of the special issue, after consideration of suitability and peer review. Presentation of work at the conference is a pre-requisite for article consideration; however, this privilege does *not* guarantee publication of an article. Papers should meet the scope of the TRANSACTIONS. Papers that are suitable for *presentation* at a professional conference might not be suitable for *publication* in a peer-reviewed format, and authors should expect to be challenged by referees if the achievement or work increment does not have substantial merit. In addition to the selection criteria above, all articles must conform to policies and standards described in Sections VI and VII of this document.

This template is intended for Microsoft Word 2007 or later. The option to maintain compatibility with previous versions has been retained, which can be disabled at the author’s discretion. Use of this document as a template is optional. If you are reading a paper version of this document, please download the electronic file from the conference website so you can use it to prepare your manuscript. If you would prefer to use LaTeX, download IEEE’s LaTeX style and sample files, IEEEtran.zip, from the IEEE Author Digital Tool Box (DTB) [1]. Use the LaTeX files for formatting, but please follow these instructions. *Authors should note that LaTeX files are not maintained in conjunction with this template, and may contain inconsistencies.*

If you have a question about formatting your paper, or a suggestion on improving these instructions, please contact the editor-in-chief of the special issue.

II. PROCESS OF SUBMISSION, REVIEW, AND PUBLICATION

A. Preparation of the Manuscript

Authors may prepare manuscripts using any word processor, provided that the format for electronic submission can be accommodated. **Authors are strongly urged to use this template.** Authors should note that this template creates a document on 8.5-inch by 11-inch paper with margins, indentation, line spacing, column widths, and other dimensions appropriately sized for the TRANSACTIONS. These dimensions may not be properly constructed on other typesetting systems or paper sizes. This can result in changes to the paper length when final text is formatted by IEEE Publications, and the assessment of extra page charges.

Please follow the writing style specified in this document, Section IV, and defined by the *IEEE Style Manual* also located

[Insert Journal Editor’s name here]

Editor-in-Chief

[Insert Journal name here]

[Insert date here - Day Month Year]

Dear Dr. [insert editor’s surname here],

We would like to submit our manuscript entitled “[insert title of your manuscript here]” for publication as an [insert article type here] in [insert journal name here].

[Provide the broad context of the work. Explain the objective of the study and how this was novel]

[State the possible importance of the findings. Explain how this is appropriate for the readership of the journal]

We confirm that this manuscript has not been published elsewhere and is not under consideration by another journal. All authors have approved the manuscript and agree with submission to [insert journal name here]. The study was supported by a grant from the [insert funding body here]. The authors have no conflicts of interest to declare.

Please address all correspondence to:

[insert name]

[insert contact address, telephone and fax numbers, and e-mail address]
