All name tricks in pokemon go

How to name your pokemon go.

For some of us, it is a vaguely familiar pokemon game asian cartoon that the gameboy began and later transformed into a Carda Trading Mania. Or was it the opposite? If you have not paid attention lately, there are still a lot of people fascinated by the universe imaginary anime. Just look at the recent controversy on the Nintendo plan to change the name of one of the most well-known pokemon characters, ever since the kooky small bust creatures on the scene over two decades ago, the Japanese creators of Pokemon in Nintendo gave each character three different names for Chinese fans: two in several Mandarin dialects and the other in Cantonese. Now they are scrapping of the Cantonese versions of all, and a lot of Hong Kong people are not too happy with it. Who knew a small change of name would raise a series of questions about linguistics, identity and politics? Probably anyone who has familiarity with the relationship between China and Hong Kong. The autonomous Chinese territory on the southern coast land that had a difficult relationship with his older brother for a nice little time. When Nintendo announced that he would celebrate the 20th anniversary of Pokemon with a couple of new games for the Nintendo portable device 3DS, giant Japanese video game also slipped into information that would simplify the names of the characters in the game versions distributed in China, Hong Kong and Taiwan. This means mixing the two mandarin handles in one and completely eliminating the Cantonese version. Pikachu, as the patron of the deductible is translected in English, is now Pi-Ka-Qiu. The problem arises from the fact that if Cantonese and Mandarin are several languages, they use the same Chinese characters, and the new spelling now sounds like Bei-Kaa-Jau in Cantonese, rather than Bei-Kaa-Chyu, who had long been the name of the character in Hong Kong. The move is not sitting well with Hong Kong activists who say it does not take into account not only the fans and their decades of devotion to toys, but also linguistic and cultural differences between the small region and the middle realm. They took protests scattered around the streets, set a protest page on Facebook, they marched in front of the Japanese consulate and gathered thousands of signatures to ask that Nintendo cancel the word Change. No if the petition was written in Mandarin or Cantonese. Find out more about this video about the controversy: image: the pokémon company when red, blue and yellow pokemon games climbed to the top of video game mania, the generation 1 pokemon were known to everyone. But now there are many versions of classic Pokemon games, including gold, silver, crystal, ruby, sapphire, red fire, leaf green and pokémon go! The question is, Can you go back to when everything started and remember every generation pokemon? These are the basic pokemon that has found time and effort to evolve through training. You had to learn their strengths and weaknesses to be the winner when you fight other Pokemon. Everyone has a personal favorite from red, blue and yellow games. Usually, the most beloved was Pikachu, but many types of Pokemon have since then come to television broadcast and games. There were also unusual types of Pokemon, like Nidoran, which could evolve like a male or a female. So, do you think you have what you need to become the next Master Pokemon? When I downloaded a new Nintendo app that my friend told me was "rather fun" a little more than a week ago I only had a question: "You can take Pikachu in" Pokemon Go"? While my friend knew the answer then (and he wanted a lot of time to finally make your hands on one), thanks to devotees and internet wonders, now we have intel on different ways to improve your chances to capture the Adorable yellow creature. Pikachu may not be the most rare or the most powerful of Pokemon, but it has always been my absolute favorite. Of course, the strange is quite cute, and Eevee is nothing to sneeze, but in my humble opinion no other Pokemon can be compared to the adorable lightning lightning of low level. Which player wouldn't want to add the iconic face of the Pokemon franchise to their Pokedex? Capture a Pikachu and finally pronounce the phrase that was burned in our young minds about 20 years ago: "I choose you, Pikachu!" Get your PokeBall around a Pikachu and live your last childhood fantasy may not be so difficult. Just like ash in the Anime series, you can actually capture a Pikachu like your Pokemon start-up. A creation of your character, three Starter Pokemon appear in front of you, ready to be captured: Bulbasaur, Charmander and Squirtle. These pokes are all fine choices, but if you repeatedly ignore these first options you will be given the chance to capture your Pikachu. Exactly, the adorable little yellow critter could be yours! If you're just downloading the game now (where were you last week? And welcome!) Don't make the same mistake I've done. I have totally failed during this first test and exploited the Charmander (Sigh). New players should stay patient when they start the game and don't settle for anything less than Pika's power! If you have lost the possibility of taking a pikachu like your appetizer, there are some other ways to track it out. Because Pikachu is a low-level Pokemon (his evolved form is Raichu), you can take it from a 2k egg if you're lucky! Most 2k eggs focus on rattles and pighies, which I know are the last things you want. But stay positive and continue incubating eggs. Every time you walk a little more than a mile, this is another opportunity for a pikachu! Even Pika-Less after a few days of play and you may want to take a more active approach to hunting for Pokemon. Just like the water type pokemon can be found near flows and rivers, Pikachu is an electric type and can be hung from local energy sources. Gamer Blog Attack of the Fan Boy suggests that the trainers of They should try to look for Pikachu in science museums and surrounding power plants. Make sure you stay safe when "Pokemon Go" games, because even Pikachu is not worth shocked. For more accurate search, make sure you use the Pokemon tracker in the lower right corner of the screen. If the outline of a Pikachu Pikachu Click on it and keep walking until the footsteps approaching. Now if only I could have a friendship and trust as special as Ash and Pikachu (* sniff *). # BestieGoals.Images: giphy, screenshots / "Pokemon Go"; © The WB since the idea of trying to "take all" appeared for the first time on our television screens that grow the cute and yellow electric Pokemon named Pikachu Pokemon called govern² them all. I would be difficult to find to find a better one to own. Well, according to the Pokemon Pikachu user population is not the most desired Pokemon there outside. In fact, Wishbone has compiled a list of the 10 most popular pokemon - and spoilers, some are more areas than the loyal and faithful pikachu. wishbone is today's most popular polling app in which voters weigh in the most hot trend arguments of the Pop culture, national news, celebrity faids and fashion trends. They get over four million monthly users who visit their app, which means that usually have a very high sample size of survey people. When placing the questions on which the Pokemon is the most desirable in the light of the peak in "Pokemon Go" users, the answers surprised everyone. The Wishbone app has interrupted over 100,000 voters of age between 12 and 25 years through the United States, and it turns out that Eevee, Jigglypuff and Vulpix are the first three pokemon that everyone is asking to capture. Pikachu is notoriously elusive and difficult to capture. Since it is the mate of the main character in the original series it is understandable that people would like to possess one for themselves. But if you try to take Pikachu day after day it's not your cup of tea, the other three pokemon are ready for grafts. While I cannot guarantee that they will find themselves on your phone right away, there is a much higher possibility that you can be a proud owner of a JigglyPuff. You can try to follow the YouTube tutorial below and find a way to start with Pikachu instead of the other three pokemon. You can see that you have to ignore the start-up pokemon together - until Pikachu appears. Then you are free to be the ketchum of ash "Pokemon Go". If you are still looking for an alternative to Pikachu and the first three other Pokemon are not interested, perhaps the rest of the answers of the polling will do it. The next first three are Wiglytuff, Squirtle and Poliwhg. Personally, I really have my heart set on Cyndaquil, but I have no idea if it was part of the original Pokemon 150. The others look great, though. This video can help you start being the best Master Pokemon using "Pokemon Go". You can ignore the whole advice and try it only yourself, because this app is better explored out with friends. In both cases Pikachu will remain my favorite. No matter how many surveys or quizzes you take, you can not convince me to stop loving this electric pokemon giallo.Images: WB WB
